LEM

Shin & Tomoko Azumi | 2000

In 1969, man landed on the moon aboard the LEM, Lunar Excursion Module. In 2000, at the turn of the millennium, the LEM stool was born, one of the symbols of Lapalma's style. The same lightness, the same absence of gravity that in the void created by the design stimulates the relationship with the environment. And just as Apollo 11 could not bear unnecessary weight, so this extraordinary seat has enclosed every function in a minimal and elegant profile. Only the essentials, the rest remained on Earth. Available in height-adjustable, self-aligning and fixed stool versions, indoor and outdoor, it is now produced as a capsule collection in three new galvanic finishes, in brushed black, blue and green, which add to the already wide range of available options. Ideal both for life around the kitchen and for reception areas, bars and restaurants.

use and maintenance instructions
Clean all parts in wood, leather, fabric and metal with a damp cloth or a diluted neutral cleaner. Do not use cleaners with alcohol, bleach, solvent or abrasive products. Any liquid spilt on the product must be wiped up immediately.When lifting or moving the product, hold it on the structure and not under the seat. The product should not be subjected to unbalanced weights, as it is designed for a proper rest on the foothold (on four legs or on the base). Our company relieves from any responsibility in case of damage caused to fragile floors. Avoid any improper use of the product: do not step on the product, on the footrest or on the armrests. Avoid any movements that could compromise the proper functionality of the product or the safety of the users.Wood and leather, being natural materials, could be easily damaged. Small impurities or imperfections are within quality standard range.Do not expose the product to weather conditions or atmospheric agents, nor to heat sources over 40°C. Also products for outdoor use could be afflicted by atmospheric agents. The product could undergo possible exterior changes due to particular exposure to heat, humidity and saltiness. An appropriate and frequent maintenance and cleaning of the product enhances its durability. The product could change colour and shade, if exposed to direct sunlight. Maintenance has to be carried out by experienced staff. Dispose of the package only after assembling the product, in order to avoid the loss of ironmongery and components. Once the product has been dismantled, the product itself or its components must be given to the public garbage disposal system, according to the legislation in force.
